Custody and Parenting Time Evaluation
Botofan-Miller/Miller Family

Mother: Loredana Botofan-Miller
Father: Brett Miller
Child: ██████████, age 6 at time of evaluation

Introduction

This evaluation was begun after a signed court order. Both parents participated equally in the evaluation. The evaluation consisted of three semi structured interviews with each parent separately, parent/child interaction sessions with each parent with ██████████, and some time spent alone with ██████████.

I asked the parents to have psychological assessment with Dr. Kathleen Gillis, PsyD, and I consulted with Dr. Gillis after her assessment was complete. I have summarized Dr. Gillis’s assessment and consultation within this report and she has approved my summary of the assessment and consultation. She is not issuing a separate report.

Dr. Skierkowski, DMD, Silvia's dentist

Dr. Skierkowski's records begin in January 2014. That visit indicates that Ms. Botofan-Miller was refusing the recommended x-rays. The dentist further recommended that the child brush twice daily, instead of one time which mother had reported doing, that she floss once daily, and that she come back in six months. **The dentists felt she had some risk factors related to excessive plaque on her teeth.**
